Kod producenta	WT-200001039

Opis produktu

Unleash the power of your engine with our Performance Intercooler Kit.

Your vehicle deserves only the best, which is why we proudly present our Performance Intercooler Kit. With impressive core dimensions of 520mm x 200mm x 100mm (stepped to 8,110cc), our intercooler offers an amazing 94% larger flow area and an impressive 37% more charge air volume compared to the original intercooler.

Our specially designed high performance intercooler core ensures outstanding cooling properties to keep your engine running at its best in all conditions.

Despite its size, our intercooler weighs only 7.6 kg, thanks to our advanced materials and manufacturing techniques. Experience powerful cooling without the added weight.

CAD designed freeform cast aluminum end boxes ensure the best possible internal airflow. Reduced back pressure means your engine can breathe more freely, resulting in improved performance.

Our kit is designed to seamlessly replace the OEM intercooler. Installation is simple and straightforward. You can even continue to use your original intercooler hoses to make installation even easier.

All of our intercoolers feature a high-quality anti-corrosion coating that not only provides optimal cooling, but also ensures a long service life.

Prepare yourself for an unparalleled driving experience. Our Performance Intercooler Kit is the key to more power and efficiency for your vehicle. Order today and feel the difference.

Performance intercooler kit for N47 engines fits the following vehicles:

BMW 120d (130KW/177hp) E81/E82/E87/E88 (2007-2013).
