Opis produktu

Extremely durable and flexible, this Mishimoto Braided Line is an ideal addition to your vehicle. Whether you're replacing a factory rubber line or adding an oil cooling system, these stainless-wrapped fluid lines are available in multiple sizes and lengths to suit any application. These Mishimoto -AN lines feature a CPE rubber inner layer which provides a durable passageway for most fuels, oils, and engine coolants, while a woven stainless-steel inner jacket increases the pressure tolerance and durability. Along with unmatched abrasion resistance, the stainless-steel or black nylon braided outer jacket of this line adds unique style to your project. The available nylon outer braid will not abrade soft materials such as plastic or aluminum in confined spaces. Our braided -AN lines feature an operating temperature range from -40°F to 300°F and pressure rating of up to 1,000 PSI, making them applicable for most fluids or air passage systems on your vehicle. As with all our products, this Mishimoto Stainless-Steel Braided Line is covered by our Lifetime Warranty.
