Cena brutto	2 699,00 zł
Cena netto	2 194,31 zł
Numer katalogowy	USA-RAD-20-0761-03

Opis produktu

20-0761-0X FUEL HANGER PLUMBING KIT, MK5 These plumbing kits include everything required to plumb the fuel system between the Radium fuel pump hanger to a port injection fuel rail. A -8AN 90 degree PuskLok hose end (shown below left) is included for connecting to an -8AN male port injection fuel rail fitting (not included). A -6AN 90 degree PuskLok hose end (below) is included for connecting to an -6AN male aftermarket FPR fitting (not included). A -6AN (3/8") fuel hose runs to the fuel pump hanger return port. The feed and/or return hose can be easily modified for installation of an in-line flex fuel sensor. Furthermore, the hoses run through billet aluminum fuel line retainers. As shown below, a special retainer is provided to prevent the lines from contacting the driveshaft and exhaust when crossing over the tunnel. An -8AN (1/2") feed hose runs from the fuel pump hanger through the provided fuel filter using a specifically designed MK5 Supra bolt-on billet mount as shown below. Depending on the kit selected (-03,-05), the fuel filter will be assembled with a choice of different elements. Go [HERE](#) for more filter element information. INCLUDES -Fuel Filter Microglass -8AN Fuel Filter Adapter Fittings -Billet Aluminum MK5 Supra Filter Mount -8AN and 6AN PushLok Hose Ends -8AN Fuel Feed Hose -6AN Fuel Return Hose -Fuel Line Retainers -Stainless Steel Hardware Instruction PDF
