RacingLine Adjustable Rear Toe Links for MQB MQBE

Cena brutto	1 491,63 zł
Cena netto	1 212,71 zł
Numer katalogowy	VWR501000

Opis produktu

The MQB & MQB Evo-platform cars rely on a stamped-steel Rear Toe Link to control the rear toe adjustment. Replace them with these rigid RacingLine Adjustable Rear Toe Links to allow for easy & precise toe adjustments making achieving your perfect track set-up geometry a simple task. RacingLine's Adjustable Rear Toe Links are a direct replacement for the stock stamped steel, softly-bushed factory links. High durometer rubber bushings at each end ensure that there is minimal deflection under the extreme loads from track use. Yet without the harshness of a solid ball-joint, these links are entirely appropriate for regular road use. Fitment of these Adjustable Rear Toe Links allow very precise toe adjustments to be made, making alignment changes for optimal track performance or to manage tyre wear easier than ever. CNC Machined from a solid billet of 6061-T6 Aluminium, each arm has been engineered to provide ultimate rigidity.
