### Opis produktu

The beautiful quality and durability of RacingLine's Billet Oil Dipstick makes it a great upgrade from the factory dipstick - as a plastic part exposed to the significant heat of a modified engine, the stock seal regularly fails. You'll look forward to checking your oil!

Doesn't your pride and joy deserve better than cheap plastic parts in the engine bay? Our beautiful billet-handled dipstick replaces the cheap plastic of the original. Checking oil level becomes a pleasure! The RacingLine dipstick uses a high-quality rubber o-ring to prevent the risk of leakage from the standard stick. It's meticulously machined using the latest CNC 5-axis technology. It's then polished, gloss-anodized in Midnight Black to stay beautiful year after year.
