Cena brutto	<b>508,28 zł</b>
Cena netto	<b>413,24 zł</b>
Dostępność	<b>Na zamówienie</b>
Numer katalogowy	<b>331552927</b>
Kod producenta	<b>VWR190006</b>

### Opis produktu

At last! A proper solution to avoid the well-documented 2.5 TFSI snapped dipstick issue. RacingLine's beautiful Oil Billet Dipstick replaces the cheap plastic of the original to making checking your oil level a pleasure. Not only does it look great in the engine bay but is also massively stronger than the original. Upgrade your factory one before it breaks off!

Unfortunately, the factory plastic dipstick in the 2.5 TFSI EA885 is notorious for the handle snapping off as you try to pull it out. With the temperature cycles from extreme heat to cold, it's no wonder that the plastic handle eventually goes brittle and fails. The new RacingLine Billet Dipstick for all the 2.5 TFSI Evo engines is the solution. It replaces the cheap plastic original, giving not just a beautiful appearance in the engine bay, but also a vastly stronger high quality replacement. Checking your oil level has never been so pleasing! The design of the RacingLine Billet Dipstick is all about the beautiful details. To ensure absolute accuracy, RacingLine have die-cast their own measurement block and tube-guide, which are then formed onto the dipstick itself for absolutely secure mounting. Meanwhile, the handle itself is meticulously CNC-machined before being hand-polished, then gloss-anodised in Midnight Black to stay beautiful year after year. A high-quality viton rubber o-ring will prevent the risk of any oil leakage. An essential upgrade for any 2.5 TFSI Evo DAZA, DAZC, DNWA, DXHA- engined car!
