Kod producenta	VWR180003

Opis produktu

RacingLine's Magnetic AWD Differential & Transfer Box Oil Plug set protects your AWD car's differential's lubrication system by attracting and separating out the minute abrasive and ferrous metal particles that are carried by the oil. For 'Haldex' AWD cars this plug set fits both front Transfer Box and Rear Differential.

Under the skin of your MQB Haldex AWD car you've got a rear differential and a centre transfer box working hard underneath you. Each of these operates in its own oil reservoir. RacingLine's Magnetic AWD Differential & Transfer Box Oil Plug set attracts and separates out the minute abrasive and ferrous metal particles that are carried by the oil, stopping them circulating through your diff and transfer box's lubrication system. The harder you use your car, the higher your power, the greater the risk of minute metallic debris and the greater the benefit of using this Magnetic Differential & Transfer Box Oil Plug set. These Magnetic Differential & Transfer Box Oil Plugs traps and removes those microscopic metal particles from your diff's lubricating oil. Install couldn't be simpler - choose our Magnetic Differential & Transfer Box Oil Plug set with your next oil-change and simply screw the new plugs in! Each kit comes with two pieces - one Magnetic Oil Drain Plug and one Non-Magnetic Oil Refill Plug. Therefore to fully equip your AWD car, you will require two of these kits. As the factory plugs are single use, our kit gives you enough washers for five services - meaning you might even save money in the long-term!
