Kod producenta	VWR180000

Opis produktu

RacingLine's Magnetic Sump Plug attracts and separates out the minute abrasive and ferrous metal particles from the drivetrain fluids, stopping them circulating through lubrication systems. A simple, cost effective upgrade to protect your motor. Why stick with your old drain plug, when you can have the RacingLine magnetic version at your next oil change that will help protect your engine from the wear and tear of metal particles? The harder your engine works, the greater the risk of minute debris, the greater the benefit of using a magnetic sump plug. Catch any particles in your oil with the RacingLine Magnetic Sump Plug to protect your engine. It works by attracting and separating out the minute abrasive and ferrous metal particles that are carried by the drivetrain oils, stopping them circulating through your engine's lubrication systems doing gradual damage to your motor's internal components. Install couldn't be simpler - insist on new Magnetic Billet Sump Plug with your next oil-change and simply screw it in!
