RacingLine Oil Management Kit Drain Tap Kit for MQB

Cena brutto	299,68 zł
Cena netto	243,64 zł
Numer katalogowy	VWR130006

Opis produktu

The RacingLine Drain Kit for their Oil Management System is a really simple addition that makes emptying the Oil Catch Can a quick, clean and simple operation. Simply screw into the base of your catch can and use the lever to empty it as often as you want. The RacingLine Oil Management Kit needs regular emptying to remove all that nasty oil residue and moisture that accumulates in the catch can. Their new Drain Kit is a really simple addition that makes emptying your Catch Can a quick, clean and simple operation. It houses a beautifully machined on-off ball valve with lever for easy and controlled draining. A banjo take off bolt screws into the bottom of your RacingLine catch can, adjustable to any angle, removing the need to unbolt the catch can from the engine mount bolt each time. Included is a 500mm silicone tube that attaches to the outlet of the valve to allow accurate draining out of the bottom of the car into a waste oil container.
