Cena brutto	282,06 zł
Cena netto	229,32 zł
Numer katalogowy	VWR13G700RFK

Opis produktu

To fit RacingLine's Oil Management Kit on Golf 7/7.5 R and certain Audi S3 8V models, you will also need this Remote Washer Refill Kit. The kit replaces the top half of the factory screenwash bottle to still allow you to refill your washer fluid easily and neatly via a beautifully high-gloss filler cap. If you drive a Golf 7 & 7.5 R and certain Audi S3 models, you will also need this Remote Washer Refill Kit to fit alongside the RacingLine Oil Management Kit. These models have a different windscreen washer bottle fitment to the other MQB cars, with the reservoir located on the right of the vehicle compared to the majority of MQB models which have the washer bottle on the left. For these cars with right-hand reservoirs, this is located where the Catch Can will be mounted. So, this kit replaces the top half of the factory washer bottle to still allow you to refill your washer fluid easily and neatly. Included is a beautifully high-gloss filler cap which locates conveniently on the front panel using the bracket provided. Also, many owners prefer the appearance of RacingLine's Remote Washer Refill and of course this can be fitted without having the RacingLine Oil Management kit installed.
