RacingLine Sport Damper Kit MQB Multi Link rear 55mm strut not 8V S3

Cena brutto	2 785,41 zł
Cena netto	2 264,56 zł
Numer katalogowy	VWR30G700

Opis produktu

For MQB cars, RacingLine's replacement Sport Dampers will bring a whole new lease of life to your car at a great price. Suitable for standard springs, or even better with VWR Sport Springs, your car will ride and handle better than ever. Give your car a whole new lease of life with the RacingLine Sport Dampers for all MQB models with multi-link rear suspension (55mm strut). Note: not applicable to Audi S3 8V. When it comes to suspension upgrades at an affordable price, the compromise between performance and comfort has been a persistent dilemma for keen drivers. With the RacingLine Performance Sport Damper kit, which consists of two front and two rear Tri-Valve dampers, this dilemma becomes a thing of the past at an affordable price. The shock absorbers have a precisely matched damping curve to the VWR Sport Spring rate or to the original factory springs - these Sport Dampers are compatible with either, plus other-brand Sport Springs (although RacingLine cannot guarantee ride quality/performance when paired with other springs). Note that springs are not included with this kit. Extensive development from our vast race set-up experience ensures superior road-holding and a positive transformation in handling characteristics, all achieved without compromising comfort. All of which guarantees greater stability, control, and a beautiful taught ride quality - and therefore driving pleasure. And isn't that what it's all about?
