RacingLine Uprated Brake Line Kit Front and Rear MQB

Cena brutto	775,67 zł
Cena netto	630,63 zł
Numer katalogowy	VWR69G7KIT

Opis produktu

One of the simplest and most cost-effective upgrades you can make to your MQB or MQB 'EVO' car - RacingLine's kit of 4 Uprated Brake Lines. Developed and proven on their racecars, these replacement lines are a direct fit and will keep your brake pedal firm, stop after stop. These direct-replacement RacingLine Uprated Brake Lines for MQB & MQB 'EVO' cars with electric park brake (not manual handbrake) help to avoid that spongy pedal under demanding conditions as heat build-up grows, giving greater braking efficiency as well as providing superior resistance to any damage or corrosion. A simple direct replacement for the factory rubber hoses, and come supplied complete with nylon locaters to ensure the hose can be secured in the same position as OEM hoses. Simply remove the factory rubber pipes and reinstall these uprated lines. Bleed the system and you're good to go. Manufactured in the UK from PTFE lined, stainless steel reinforced hose, the fittings on the end of each hose manufactured from 303 Stainless Steel. With excellent temperature resistance characteristics, these have a high level of dimensional stability (reducing expansion and creep even after prolonged stress at elevated temperatures). There's no more demanding challenge for lines than motorsport - and RacingLine's Brake Lines are proven time after time on their own cars on-circuit; even with the high temperatures that race fluids operate at. Temperature Limits range from -73°C (-100°F) right up to +260°C (+500°F). Working Pressure Ratings: -3 = 350 Bar (5000 psi) to -16 = 80 Bar (1150 psi). This kit comprises four direct-replacement brake lines for front and rear, made to the exact correct lengths for Golf 7 and MQB vehicles. Not applicable for models with cable handbrake - electronic parking brake only. Please note, RacingLine also offers pairs of front or rear Uprated Brake Lines. These uprated lines make one of the most cost-effective upgrades you can make to your car, whether running standard brakes or uprated, and are the perfect compliment to RacingLine's RBF312 Brake Fluid.
