RacingLine Uprated Brake Line Kit Rear MQB

Cena brutto	458,38 zł
Cena netto	372,67 zł
Numer katalogowy	VWR69G7RR

Opis produktu

RacingLine's pair of two Rear Uprated Brake Lines for MQB cars with electric park brake (not manual handbrake). Developed and proven on their racecars, these replacement lines are a direct fit and when used in conjunction with their Uprated Front Lines will keep your brake pedal firm, stop after stop. These direct-replacement RacingLine Uprated Rear Brake Lines for MQB & MQB 'EVO' cars help to avoid that spongy pedal under demanding conditions as heat build-up grows, giving greater braking efficiency as well as providing superior resistance to any damage or corrosion. A simple direct replacement for the factory rear rubber hoses, and come supplied complete with nylon locaters to ensure the hose can be secured in the same position as OEM hoses. Simply remove the factory rubber pipes and reinstall these uprated lines. Bleed the system and you're good to go. Manufactured in the UK from PTFE lined, stainless steel reinforced hose, the fittings on the end of each hose manufactured from 303 Stainless Steel. With excellent temperature resistance characteristics, these have a high level of dimensional stability (reducing expansion and creep even after prolonged stress at elevated temperatures). There's no more demanding challenge for lines than motorsport - and RacingLine's Brake Lines are proven time after time on their own cars on-circuit; even with the high temperatures that race fluids operate at. Temperature Limits range from -73°C (-100°F) right up to +260°C (+500°F). Working Pressure Ratings: -3 = 350 Bar (5000 psi) to -16 = 80 Bar (1150 psi). This kit comprises two direct-replacement REAR brake lines, made to the exact correct lengths for Golf 7 and MQB/MQB EVO vehicles - please note, the rears are not applicable for models with cable handbrake - electronic parking brake only. Please note, RacingLine also offers a full kit of four front and rear Uprated Brake Lines. These Front Uprated Brake Lines make one of the most cost-effective upgrades you can make to your car, whether running standard brakes or uprated, and are the perfect compliment to RacingLine's RBF312 Brake Fluid.
