Cena brutto	116,23 zł
Cena netto	94,50 zł
Dostępność	Na zamówienie
Numer katalogowy	331552310
Kod producenta	VWR630100

Opis produktu

The RacingLine Wheel Mounting Guide Pin is an essential addition to keep in your car's tool kit. By supporting the full weight of your heavy alloy wheel as you refit it, it makes alignment of the other 4 bolt holes (plus any spacers) easy for safer mounting.

Ever experienced the frustrating and back-straining process of holding a heavy wheel in place with one hand whilst trying to line up and thread-in the first bolt? The RacingLine Wheel Mounting Guide Pin is the simple answer. Before fitting a wheel, simply screw the Mounting Guide Pin into one of the top bolt holes on the wheel hub. The wheel can then be lifted and placed on the guide pin, supporting its full weight and keeping the bolt holes aligned to allow the other bolts to be easily inserted and tightened. This avoids that awkward process of keeping the wheel in place with one hand whilst lining up and threading in the first bolt - particularly valuable when spacers are also fitted. Once the other four bolts are in place, remove the pin and insert your final bolt. By making fitment of wheels easier, you'll avoid the risk of brake rotor damage, vital for cars with carbon ceramic brakes. Easily stored between wheel changes in your car's tool kit, ready for whenever you need it! Whether your car is standard or modified, this is a great tool to keep in the toolkit at all times!
