## Red Line Engine Oil Break-In Additive RD-81403

Cena brutto	<b>115,00 zł</b>
Cena netto	<b>93,50 zł</b>
Dostępność	<b>Na zamówienie</b>
Numer katalogowy	<b>331572019</b>
Kod producenta	<b>USA-RD-81403</b>

### Opis produktu

#### Red Line Engine Oil Break-In Additive

- Provides conventional engine oils with antiwear additives like zinc and phosphorus (ZDDP) necessary to protect against camshaft and valvetrain damage on break-in
- Allow pistons rings to seat properly with less-slick oil while antiwear additives protect other engines components to avoid excessive wear
- Can also be used in conventional and synthetic oils during regular operation providing an extra package of protection otherwise not found in most engine oils
- 455ml bottle treats up to 11 litres of engine oil--in many cases one bottle can serve two engines or oil changes

#### Further Info

Racing oils provide more wear protection than engine oils for passenger vehicles, however, these products contain fewer detergents and are not suitable for street use

- Reformulated for improved frictional properties
- Special detergents for improved lubricity and less detonation
- Polyol ester base stocks provide more stability and film strength when exposed to excess fuel dilution
- Each of these products has no less than 2200ppm of zinc and phosphorus for antiwear
- Improved protection at startup, lower oil temp, cleanliness
- Remember to change these oils more frequently than regular engine oils
