Cena netto	1 097,55 zł
Dostępność	Na zamówienie
Numer katalogowy	331429965
Kod producenta	USA-ARE-13224

Opis produktu

The A1000 return style Regulators were designed for use with our A1000 and Eliminator Fuel Pumps or similar style EFI pumps in a carbureted application. These regulators are perfect for naturally aspirated or 'blow-through' supercharged engines. Base fuel pressure adjustable from 3-15 PSI. (1) ORB-10 inlet port and (1) ORB-08 return port. P/N 13224 provides (4) ORB-06 outlet ports and 1/8" NPT gauge port. Fuel pressure rises on a 1:1 ratio when referencing boost. Return style design provides the ultimate, dynamic fuel delivery system. Ideal for converting from fuel injection to carburetion using the stock, in-tank pump. This product is not legal for sale or use on emission-controlled vehicles except when used as a direct replacement part matching OEM specifications. EFI conversions will require a larger-than-stock return line for proper low pressure control. Note: Requires AN-08 return line with A1000 Fuel Pump. For Eliminator applications use P/N 15641 to adapt AN-10 return line to the ORB-08 return port on regulator.
