Regulator ciśnienia paliwa Turbosmart FPR 800 1/8 NPT

Cena brutto	1 096,74 zł
Cena netto	891,66 zł
Cena poprzednia	1 218,60 zł
Dostępność	Na zamówienie
Numer katalogowy	331430935
Kod producenta	TS-0401-1001

Opis produktu

High-performance fuel pressure regulator. Features 1/8 NPT fittings, 30-70 PSI base pressure adjustments, 1:1 ratio. Ideal for modified street cars with up to 800hp fuel systems using pump fuel including E85.

WHAT IS A FUEL PRESSURE REGULATOR?

A fuel pressure regulator's job is to maintain constant fuel pressure above the intake manifold pressure.

WHEN DO YOU NEED TO INSTALL ONE?

The installation of performance fuel injectors or a high-flow fuel pump requires the use of an aftermarket fuel pressure regulator to allow pressure adjustments while maintaining a stable base pressure. They can also be used to maximise a standard fuel system's ability to cope with minor power modifications.

WHY BUY A TURBOSMART FPR?

All TurboSMART FPRs are manufactured from billet aluminium and hand-assembled to ensure maximum precision. TurboSMART FPR's have been designed to provide smooth and stable fuel pressure delivery under all conditions from idle to full throttle and are suitable for use with both electric and mechanical fuel pumps. The FPR range features an easy screw and lock adjustment and provide a stable 1:1 ratio between fuel pressure and manifold pressure. Each FPR is backed by a variety of accessories such as fuel rail adapters and fittings to suit most popular makes and models.

Supplied With:

Mounting bracket and bolts, vacuum fitting, gauge port blank.
