Opis produktu

Maximize Your BMW's Track Performance with RacingDiffs Multi-Variant Ramp Set Unlock the full potential of your BMW's limited slip differential with our precision-engineered Multi-Variant Ramp Set. Designed for racers and performance enthusiasts, this set allows you to customize the locking behavior of your differential to match specific racing conditions or driving styles. Key Features: Versatile Lock Settings: Choose from three ramp angle positions (30°/30°, 30°/60°, 50°/65°) to tailor the differential's lock rate—from a mild 25% up to an aggressive 100%, both on 1.5 and 2 way. High-Quality Construction: Each pressure plate is forged for unmatched strength and durability, with a CNC finish that ensures a perfect, hassle-free installation. Chemical Heat Treatment: Enhances the wear resistance of the plates, making them capable of withstanding the rigors of any racing environment. Why Choose RacingDiffs? Adaptability: Easily adjust your setup on the fly to suit various track layouts and conditions without needing multiple differentials. Plug & Play Installation: Designed to fit seamlessly into your existing setup, allowing for quick and easy adjustments. Optimized for Racing: When combined with our Performance Clutch Set, this ramp set delivers superior locking performance that can significantly improve lap times and handling precision. Complete LSD Solution: Our top-of-the-line All Solutions LSD unit comprises the Multi-Variant Ramp Set and performance clutch pack providing an all-encompassing upgrade for serious competitors.
