Opis produktu

REMOTE MOUNT FUEL FILLER

A remote mounted fuel filler is NOT located directly on the fuel tank or fuel cell, but rather somewhere else on the vehicle, such as the fender.

20-1005-V Remote Mount Fuel Filler, 1.5in, Vented

The fuel filler typically secures to the vehicle body. The vented fuel cap has roll-over protection if the vehicle ever becomes inverted. The fill neck has a machined hose barb connection for 1.5" filler hose. The outer diameter is 4.75" and uses 4.25" P.C.D for the five M5 bolts. Total height is 4.1". Requires a 77mm (3.03") hole to be fabricated.

Included:

- Vented Cap with Roll-Over Protection
- Flanged Fill Neck for 1.5" ID Hose
- Ozone/Flame Resistant Gasket
- Anodized Aluminum Nut Ring
- Stainless Steel M5 Bolts
- Tether Components

Notes:

1. Does not include accessories to connect to the fuel tank.
2. Can be upgraded later to a dry break using Radium 20-0549-V.
