Replacement Brake Vacuum Hose for Audi TT, S3, and SEAT Leon Cupra

Cena brutto	180,61 zł
Cena netto	180,61 zł
Dostępność	Na zamówienie
Numer katalogowy	379173534

Opis produktu

As a cost effective replacement or a precautionary replacement to avoid the potential failure we produce this silicone reinforced hose.

The 225/210 hp 1.8T engines as fitted in the MK1 Audi TT, Seat Leon Cupra R and Audi S3 have a organic rubber hose on the intake manifold that feeds the brake vacuum system. This hose is prone to failure leading not only to a loss of engine power but also brake efficiency. The OEM replacement is only available with the hard pipes included, which incurs considerable unnecessary expense.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
