Replacement Piston Turbo Actuator for the Saab 900

Cena brutto	1 441,79 zł
Cena netto	1 441,79 zł
Dostępność	Na zamówienie
Numer katalogowy	379172962
Kod producenta	FMPAC900
Kod EAN	*5056721208183*

Opis produktu

A replacement turbo actuator for the Saab 900. This actuator uses a piston design for maximum longevity in comparison to the OEM diaphragm unit. Using a range of available springs this actuator can be tuned to suit your requirements. Uses original mounting bracket (Not Supplied). This is suitable for the Saab 900 2.0T and Saab 9-3 2.0T using the T25 / T28 turbos built from 1994 to 1999. This product is built with a predetermined actuator spring suitable for at, or slightly above factory boost levels. The actuator can be assembled with a stiffer spring upon request. Please contact us directly concerning this process. It is designed and built with the intention of increasing the boost output of a turbocharged system. We cannot guarantee compatibility with all applications, nor the ability to increase the boost output beyond a level that is within the parameters set by the engine-management-system of the given vehicle at the time of installation, whether that system is factory or aftermarket. Forge Motorsport nor any of its authorised distributors can assume any responsibility for any adverse effects resulting from the installation and tuning of this product onto a vehicle whose engine-management-system, whether factory or aftermarket, is not capable of allowing for the desired level of adjustment. While Forge Motorsport is happy to supply you with an actuator capable of holding boost beyond that of your factory unit we are in no way capable of knowing nor suggesting that your vehicle's engine or related systems are capable of supporting or surviving the stresses of such elevated boost pressure. After requests for a very durable, fit and forget version of our actuators that would withstand the rigors of marine corrosion or simply would not tarnish, we have now added the option of ordering any of our piston design actuators with stainless steel bodies and external components/fixings. This option does incur a surcharge and will be shown when added to your basket.
