Opis produktu

Tired of sluggish gear changes in your Volkswagen Golf MK3? The RevIn Short Shifter is your ticket to a more engaging and precise driving experience. Engineered specifically for the Golf MK3 / Jetta Mk equipped with an early 02A or 02J early transmission, the RevIn dramatically reduces shift throw by 40%, turning every gear change into a lightning-fast flick of the wrist. But that's not all. Our innovative self-centering spring virtually eliminates unwanted shifter movement, giving you the level of control and precision you crave. With the shifter positioned closer to the steering wheel, you'll experience quicker reaction times and improved handling, especially when navigating tight corners. To top it off, the RevIn includes a lockout mechanism for reverse, 5th, and 6th gears, preventing accidental shifts and ensuring you stay firmly in control at all times. Upgrade your Golf MK3 today and discover the thrill of short-shift precision. Knob Color: Black
