Opis produktu

RTMG IS12/IS20/IS38 TURBO TO 1.2/1.4 TSI EA211 ADAPTER PLATE Overview: The RTMG Turbo Adapter Plate is a precision-engineered component designed to facilitate the installation of IS12, IS20, or IS38 turbochargers onto 1.2 or 1.4 TSI EA211 engines. This adapter plate allows enthusiasts and professionals to upgrade their vehicle's performance by leveraging the capabilities of higher-end turbochargers originally designed for larger displacement engines. **Key Features:** - **Precision Engineering:** CNC-machined from high-grade aluminum for durability and optimal fit. Ensures a perfect alignment between the turbocharger and the engine manifold, minimizing potential for leaks and boosting efficiency. - **Versatile Compatibility:** Compatible with IS12, IS20, and IS38 turbochargers, offering flexibility for various performance goals. Specifically designed for the 1.2 or 1.4 TSI EA211 engine, ensuring seamless integration without the need for extensive modifications. - **Performance Enhancement:** Enables the installation of larger, more efficient turbochargers, resulting in significant horsepower and torque gains. Enhances the engine's breathing capabilities, providing better airflow and increased boost potential. - **Ease of Installation:** Comes with all necessary mounting hardware. Designed to be a bolt-on solution, reducing installation time and complexity. - **Robust Construction:** Heat-resistant materials withstand high operating temperatures and pressures typical of turbocharged engines. Corrosion-resistant finish ensures longevity and maintains appearance over time. - **Optimized Design:** Compact and lightweight design does not add significant weight to the engine bay. Maintains OEM reliability while providing aftermarket performance benefits. **Benefits:** Improved Engine Performance: Unlocks the full potential of the 1.2 or 1.4 TSI EA211 engine by allowing the use of more capable turbochargers. Cost-Effective Upgrade: Offers a budget-friendly way to significantly boost engine performance without needing to replace the entire engine or vehicle. Enhanced Driving Experience: Delivers noticeable improvements in acceleration, responsiveness, and overall driving dynamics. **Applications:** Ideal for car enthusiasts looking to upgrade their 1.2 or 1.4 TSI EA211-powered vehicles. Suitable for both street and track use, providing reliable performance under various driving conditions. Perfect for tuning shops and performance workshops offering turbocharger upgrades. **Compatibility:** Turbochargers: IS12 / IS20 / IS 38 Engine: 1.2 / 1.4 TSI EA211 **Package Includes:** RTMG Turbo Adapter Plate Mounting hardware (bolts, washers, and gaskets) **Notes:** Professional installation is recommended for optimal results. Tuning and calibration of the engine management system required to maximize performance benefits. The RTMG IS12 / IS20 / IS38 Turbo to 1.2 / 1.4 TSI EA211 Adapter Plate is your gateway to unleashing the hidden power of your 1.2 or 1.4 TSI engine, providing a straightforward and effective solution for turbocharger upgrades.
