Opis produktu

Bolt On Solution for VW Golf MK8 GTI / R Introducing the RTMG Carbon Fiber Air Intake - the ultimate bolt-on solution for optimizing your VW Golf 8 GTI / R performance! With its advanced design and high-quality construction, this air intake system is engineered to deliver significant gains in horsepower, torque, and overall engine efficiency. Over +17hp gains* on dyno at Stage 1 setup. Designed to fit seamlessly into your vehicle's engine bay, the RTMG Carbon Fiber Air Intake is a true bolt-on solution that requires no modifications or special tools to install. Simply remove your vehicle's factory air intake system and replace it with the RTMG Air Intake, following the step-by-step instructions included with your kit. Stage 1 kit includes : 1 x Carbon Fiber Air Intake 1 x 76mm Air Filter 1 x Inox Clamps Stage 2 kit (SUITABLE ONLY FOR RHD CARS) includes : 1 x Carbon Fiber Air Intake 1 x 100mm Air Filter 1 x Air Intake Silicone Hose 1 x PCV Silicone Hose 5 x Inox Clamps Designed with precision When it comes to creating high-quality products, precision is key. That's why our carbon fiber air intake is designed with precision every step of the way. From the initial concept and design stages, to the manufacturing and quality control processes, every detail is carefully considered and executed to ensure the best possible outcome. Our team of skilled engineers and designers use state-of-the-art technology and equipment to ensure that each component of our product is crafted to the highest standards. Every measurement is carefully calculated, every curve and angle is meticulously crafted, and every surface is finished to perfection. Race track-tested and proven At RTMG Performance, we don't just rely on theory or speculation when it comes to designing and testing our products. That's why we take pride in saying that our product is race track-tested and proven. We understand that when it comes to high-performance products, it's not enough to just look good on paper - they must also perform under the most demanding conditions. That's why we put our product to the test on some of the most challenging race tracks in the world. Our team of experienced drivers and technicians took our product through its paces, pushing it to its limits and beyond. We tested it in extreme temperatures, in varying driving conditions, and in high-stress situations to ensure that it would perform flawlessly. And the results speak for themselves - our product exceeded our expectations and passed with flying colors. It performed consistently, delivering top-notch performance and reliability, just as it was designed to do. Dyno Tested* *The dyno testing results showed that our product delivered an amazing power increase of +17hp over the factory air intake system at Stage 1 setup. By allowing more cold air to flow into the engine, our product increases combustion efficiency, resulting in more horsepower, torque, and overall engine performance. But the benefits don't stop there. The increased power output also means better acceleration, faster throttle response, and improved overall driving performance. And with our product's easy bolt-on installation, you can enjoy all these benefits without any complex modifications or installations. Be a racer like us .. Do you dream of the thrill of high-speed racing, the adrenaline rush of pushing your car to its limits, and the satisfaction of being a true racing champion? Well, now you can make that dream a reality with our product. At RTMG Performance, we're passionate about all things racing - and we want to share that passion with you. With our carbon fiber air intake, you can take your driving experience to the next level and become a true racer like us. Our carbon fiber air intake is designed to deliver top-notch performance, reliability, and style - everything you need to take on the competition and emerge victorious. Whether you're hitting the track or just cruising down the highway, our product will help you unleash your inner racer and take your driving experience to the next level. * With a Stage 2 Carbon Air Intake Kit
