RTMG Performance Carbon Fiber Oil Catch Can Kit for 1.8/2.0 TSI Large Black

Cena brutto	2 716,98 zł
Cena netto	2 208,93 zł
Numer katalogowy	RTMG-901-0187

Opis produktu

One common problem of the TSI engines is the carbon build-up on the intake valves. Due to the direct injection fueling system, where fuel is sprayed directly into the combustion chamber, the intake valves are not cleaned by fuel, therefore carbon deposits, a product of oil fumes of the stock PCV system, build-up on the valves. The RTMG Oil Catch Can kit can reduce the carbon build up on the intake valves up to 60%. The catch can also prevents oil pooling into the intercooler and intercooler hoses. Our smart three-stage filtering system takes care of the lighter vapors, while it also features a unique direct path to the bottom of the catch can for the heavy oil vapors, resulting in cleaning up to 99% of the returned fumes/vapors. Specifics: Carbon Fiber Oil Catch Can Three Stage Baffling System Oil Level check with a dipstick Reduces Carbon Build Up Fits 1.8 / 2.0 TSI Engines with code: BZB, CDA, CJE, CAW, CCT, CCZ * Does not fit the BYT engine
