### Opis produktu

Our Pressure Relief Piston valve is a bolt-on valve that replaces the factory plastic Diverter Valve which often, fails.

The Valve works perfectly without any check engine light in the dashboard, solenoid driven operation guarantees ECU communication. The Piston type valve is engineered to remedy the issues experienced with the factory valves when their diaphragm ruptures or when their piston breaks, resulting in boost leaks and premature wear of the turbocharger.

Our valve is designed to work for a lifetime without fail, because it is serviceable.

#### Specifications:

- CNC Billet Anodized Aluminum
- High Temp Viton O-Rings
- Smaller Vacuum space than any other valve in the market
- Fast Piston Opening
- Better Throttle Response
- No Boost Leak
- Serviceable

**Vehicles:** Porsche 911 Turbo / GT2 (997)
