RTMG Performance Oil Catch Can Kit AN10 for 1.8/2.0 TSI EA888.3 Large Black

Cena brutto	2 452,99 zł
Cena netto	1 994,30 zł
Numer katalogowy	RTMG-901-0635

Opis produktu

One common problem of the TSI engines is the carbon build-up on the intake valves. Due to the direct injection fueling system, where fuel is sprayed directly into the combustion chamber, the intake valves are not cleaned by fuel, therefore carbon deposits, a product of oil fumes of the stock PCV system, build-up on the valves. The RTMG Oil Catch Can kit can reduce the carbon build up on the intake valves up to 60%. The catch can also prevents oil pooling into the intercooler and intercooler hoses. Our smart three-stage filtering system takes care of the lighter vapors, while it also features a unique direct path to the bottom of the catch can for the heavy oil vapors, resulting in cleaning up to 99% of the returned fumes/vapors. Specifics: CNC Billet Oil Catch Can Monoblock Three Stage Baffling System Oil Level check with a dipstick Drain-in-seconds system with drain valve Serviceable three-piece design 16 mm or AN10 Barb Fittings Reduces Carbon Build Up Small Dimensions & Capacity : 120 x 80mm - 300ml Large Dimensions & Capacity 160 x 80mm - 400ml
