Opis produktu

Reinforced Clutch Kit for Audi A4 & A5 with 1.8 / 2.0 TFSI CDH Engines - FWD & AWD - Up to 600NM torque handling. A plug-and-play upgrade solution for front-wheel-drive and all-wheel-drive Audi A4, A5, and Q5 (2008-2011) with 1.8L and 2.0L engines. The kit includes a dual-mass flywheel with a larger disc diameter than the OEM, a Sachs Performance pressure plate, and a disc with reinforced friction materials. It is designed for applications with higher power output than stock. Due to the larger clutch diameter and increased pressure from the pressure plate, it can handle power levels close to 500 HP and 600 Nm of torque.
