RTMG Performance Universal Aluminum Front Mount Intercooler Large 55x23x6.5 420HP

Cena brutto	763,88 zł
Cena netto	621,04 zł
Numer katalogowy	331506638
Kod producenta	RTMG-901-0094

Opis produktu

RTMG Universal Aluminum Front Mount Intercooler is a high-performance intercooler designed to improve the efficiency and power of your vehicle's engine. An intercooler is a type of heat exchanger that is used in forced induction systems to cool the intake air charge before it enters the engine. This helps to increase horsepower and torque, as well as improve overall engine performance.

The RTMG Universal Aluminum Front Mount Intercooler is made from high-quality aluminum, which is known for its strength and durability. This material is able to withstand the high pressures and temperatures found in the engine bay, ensuring that the intercooler can perform at its best.

The intercooler features a large core size, which provides maximum surface area for heat dissipation. This allows the intercooler to effectively cool the intake air charge, increasing horsepower and torque. The core is also designed with a high-flow, low-pressure drop configuration, which helps to reduce turbo lag and improve throttle response.

In addition to its performance benefits, the RTMG Universal Aluminum Front Mount Intercooler is also easy to install. It features a universal design, which means that it can be used on a variety of vehicles.

Overall, the RTMG Universal Aluminum Front Mount Intercooler is an excellent choice for anyone looking to improve the performance of their vehicle's engine. Its high-quality construction, large core size, and easy installation make it a reliable and effective upgrade.
