Opis produktu

Upgraded LPFP for TSI EA111: Powering Up to 600 Horsepower

Introducing our upgraded Low-Pressure Fuel Pump (LPFP) for the 1.4 EA111 engine, equipped with the high-performance Walbro 450 pump. This advanced fuel pump is designed to support engines producing up to 600 horsepower, ensuring consistent fuel delivery and optimal performance.

Key Features:

- **Walbro 450 Pump:** Known for its exceptional reliability and high flow rates, the Walbro 450 pump guarantees stable fuel pressure even under the most demanding conditions.
- **Supports Up to 600 Horsepower:** Perfect for high-performance applications, providing the necessary fuel supply to fully unleash the potential of your 1.4 TSI EA111 engine.
- **Enhanced Durability:** Built to withstand the stresses of high-output engines, offering peace of mind and dependable performance during spirited driving.

Installation Requirements:

Fuel Pump Controller: Crucial for precise management of the fuel delivery system, ensuring the Walbro 450 operates efficiently within optimal parameters or relay and extra power line connection, these components are essential to handle the increased electrical demands of the high-performance pump, ensuring consistent and reliable operation.

Upgrade your 1.4 TSI EA111 engine with our Upgraded LPFP featuring the Walbro 450 pump, and experience the true power and reliability of your vehicle. Whether for spirited street driving or competitive racing, this fuel pump solution is engineered to deliver superior performance, meeting and exceeding your expectations.
