Silicone Coolant Hose Kit for Renault Clio III RS

Cena brutto	1 714,49 zł
Cena netto	1 714,49 zł
Dostępność	Na zamówienie
Numer katalogowy	379177517

Opis produktu

This set of six silicone coolant hoses have been designed for the Renault Clio III R.S to replace the OEM rubber hoses which we have now seen start to fail. This is due to the construction of the original hoses which have a shelf life and start to break down and split over many heat cycles. Rubber will naturally start to weaken and perish as it gets older too; so with these considerations, we have developed a product which will **combat all of these issues** to feature proof the Clio's cooling system.

Forge Motorsport has designed this silicone hoses kit whilst working in conjunction with <https://www.pure-motorsport.co.uk/> to **withstand pressures** that can be experienced on tuned and remapped engines. The construction of the hoses is three ply Fluro-silicone lined to allow safe use with OAT type coolants. They will long outlast the original hoses which is **backed up with our limited lifetime warranty**.

Not only a functional purchase but also a product which improves the look of the Clio engine bay, helped by the three colour options in the drop down menu above. Even the machined aluminium joiner and bleed valve are beautifully made and **look stunning**.

We recommend you give yourself two hours to install all the hoses, remembering that you will have to drain your coolant to fit these so make sure to have a tray to catch all the coolant. Forge Motorsport would recommend a coolant change if it has not been carried out recently.

- Joiner and bleed valve manufactured from **6082** aerospace grade aluminium.
- The hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- Lifetime warranty
