Opis produktu

These new race-quality coolant hose kits for the Renault Megane 225 and 230hp models have been designed to replace the OEM hoses as a direct fit. Not only are all Forge hoses designed to withstand much higher pressures and temperatures than any original equipment hose, they are also available in three different colours, including the discreet looking black finish for those looking to create a real 'factory with attitude' engine bay. Or red and blue for those that aren't... Each kit has been designed and developed here in the UK. These hoses not only make a great insurance policy on a standard car, but they're also an essential upgrade on a remapped or modified machine.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
