Opis produktu

A set of Silicone Coolant Hoses (6) for the Nissan GTR R35. These hoses replace the top radiator hose, bottom radiator hose, top header tank hose, bottom header tank hose, hose from the engine filler to the block, and the water overflow hose. They are made from high quality reinforced silicone which means that they can withstand the 1.8 bar pressure from the Spec V radiator cap, should you have one fitted.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
-
