Silicone Hose for Valves on Porsche 996/911 Turbo

Cena brutto	412,57 zł
Cena netto	412,57 zł
Dostępność	Na zamówienie
Numer katalogowy	379173076

Opis produktu

This hose allows the installation of the twin recirculation valves on the Porsche 996 turbo. Whilst this is a replacement for the OEM hose, it has been updated to withstand the higher temperatures and pressures often associated with tuned or track vehicles, thus reducing the risk of premature failure that has been attributed to the OEM hose.

PLEASE NOTE: THIS IS THE HOSE ONLY (Valves not included)

Please be aware that these hoses were patterned from right hand drive vehicles. Whilst we believe these to be correct for left hand drive vehicles we suggest that you visually check their suitability, as replacement items, with those fitted to your own vehicle, before attempting installation.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
