### Opis produktu

This Sparco Circuit II QRT seat has been completely redesigned using QRT technology, making it lighter and stronger than its predecessor. The seat features an integrated DTC system, as well as fabric with shoulder and seat grips, and a split cushion for greater comfort. For fastenings, prefer side fastenings with 290mm centers. What is QRT technology? Created and developed in Italian laboratories, QRT technology is based on aerospace technologies. This innovative production method is capable of generating the lightest and strongest fiberglass seat shells on the market, guaranteeing a weight reduction of 30% compared with standard seats! Also available in standard size: Ref: 008010RNR Please note: As this is a size L/XL bucket, it may require modification of your specific Sparco base plate for mounting.
