Opis produktu

A steel mounting bracket with M6 threads for a simple and secure installation of the Nuke Performance Remote quick lock filler cap.

This durable steel bracket is delivered with M6 bolts and useful stickers to clearly mark the type of fuel your car uses, reducing the risk of using the wrong fuel. This bracket is versatile and can be welded or bolted to your chassis, tubes, or bars within your rear quarter panel or in your trunk, making refueling your car a breeze.

High-grade steel, perfect for welding or bolting
M6 threads and 5x stainless steel bolts included
Fuel-type stickers included
Easy installation for the Remote quick lock filler cap

Upgrade your vehicle's fuel system with the Nuke Performance Remote quick lock filler cap. Our 5-bolt pattern design makes installation a breeze, allowing you to secure the filler cap in both safe and easily accessible locations. With this accessory installed in a convenient spot, refilling your fuel cell equipped with a CFC Unit becomes quick and effortless, eliminating the need to fumble around in the trunk of your vehicle.

Delivered with fuel stickers that let you mark your preferred fuel to minimize the risk of putting the wrong fuel into your tank.

The Nuke Performance steel mounting bracket for the Remote quick lock filler cap includes attractive stickers that make it easy to identify the type of fuel for your car, such as petrol, E85, E100, methanol, race fuel, or even "bio hazard" and "nuke juice". It also improves the appearance of the filler cap installation, at least in our minds.

Makes installation as simple as it gets, you can either weld or bolt this bracket into many different locations.

The Nuke Performance steel mounting bracket for the Remote quick lock filler cap offers versatile installation options. You can choose to weld or bolt the bracket into your frame or body. Installed in an easy-to-reach location, refilling your fuel cell equipped with a CFC Unit is quick and effortless without having to fumble with reaching into the trunk of your vehicle. For added versatility, an anodized aluminum nut ring with M6 threads is also available for optional mounting (available here) making it perfect to install the filler cap into your body panel or Lexan window.

Aluminum nut ring for remote filler cap Part # : 150-30-112
