Opis produktu

Crankcase breather hose for Suzuki Swift 1.4 Turbo (ZC33S) and Suzuki Vitara 1.4 Boosterjet.

This hose connects between the cam cover and inlet pipe, a replacement for OEM Part No. **2009147**

The breather hose is Fluoro lined to prevent oil leaking through the silicone and discolouring it over time.

Available in red, blue, or black - simply select your choice in the options above. Complete with the appropriate hose clamps.

This breather hose also compliments the Forge induction kit [FMINDK29](#) for the Suzuki Swift.

The original hose clamps can be reused but if you would like replacements please find them [here](#).

- The Forge silicone hose in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*
