Opis produktu

GReddy Turbo Kit for ZC31S For Suzuki Swift Sport ZC31S (05-12) Engine code : M16A Ideal for lightly tuned engines Turbo TD04H 15G at 0.5 bar Power output : ~205 hp With or without catalytic converter High quality build Easy to install bolt-on kit Made in Japan GReddy Turbo Kit for Suzuki Swift Sport Specifications With a great deal of experience in the turbo field, GReddy offers very high quality kits specially designed to supercharge originally N/A engines. Rather than opting for an expensive N/A build involving the replacement of many internal parts, the choice of a conversion kit like this can prove to be more interesting in terms of performance and budget. Developed for the Suzuki Swift I Sport (ZC31S, 2005-2012), this TD04H 15G turbo "plug and play" kit ensures easy assembly and is fully suited to the engine bay of your car. Indicated for stock engines, this balanced kit adapts to all uses and provides a significant gain in power and torque over the entire range of use of the M16A, while maintaining excellent reliability. This turbo kit is available with or without a catalytic converter. It requires the installation of 4 injectors flowing 380 cc per minute minimum (not supplied), and requires a re-map the existing ECU. For optimal longevity of your engine, the installation of an oil cooler is recommended. Kit contents TD04H 15G turbo, 0.5 bar boost Stainless steel exhaust manifold Stainless steel downpipe Type 41F intercooler Aluminium piping GReddy Airinx air filter GReddy e-Manage Ultimate ECU, with pre-integrated mapping Bolts, seals, hoses and other parts required for assembly Note: the product may be differ slightly from the images presented on this page.
