Opis produktu

Modern cars use a variety of plastic clips to hold numerous panels and small components in place. Trying to remove these clips with the wrong tools can cause damage to the panels and/or clips. Having a dedicated panel clip removal tool can save you time and frustration by providing a safe and efficient method for clip removal. Mishimoto's Panel Clip Pliers are a great addition to your toolbox and are ideal for removing tree retainer clips, push retainer clips, and door panel retainer clips. These clips can be found on body panels, under the hood of your vehicle, and in numerous locations on the interior of your vehicle. Our Panel Clip Pliers feature a durable steel construction with rubber coated handles for superior grip. Mishimoto Panel Clip Pliers low-profile head design allows for use in confined areas and removes even the toughest to access clips. As with all our products, these Panel Clip Pliers include our signature Mishimoto Lifetime Warranty.
