The Supersize Valve - Only the Biggest Will Do

Cena brutto	731,43 zł
Cena netto	731,43 zł
Dostępność	Na zamówienie
Numer katalogowy	379174740
Kod producenta	FMDVSUPR
Kod EAN	*5056721240206*

Opis produktu

We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner

The Forge Supersize valve has been specifically designed and engineered to offer extreme flow rate capability, where only the largest valve will do.

Often when engines have been tuned by installing larger turbo's, software upgrades, and many other boost increasing modifications, improved turbo response can be achieved by fitting the Industry leading Forge Supersize valve, which has the advantage of a greater internal mass air flow specification, utilising an amazing 50mm (2") internal bore, and an aerodynamic piston to direct the air through the large 40mm inlet and discharge ports (1 5/8").

- The Forge Supersize valve can be used on Turbo charged or Super charged applications
- CNC machined piston for optimal flow velocity.
- Solid works generation of enhanced internal piston design, allowing for optimum flow characteristics.
- The Supersize valve utilises Viton O Rings, this material has a very high resistance to temperature and engine vapours.
- The Supersize valve is guaranteed for life.
- Internal service kit available.
- The highest flowing, largest displacement valve on the market.
- Engineered for Performance

Available in machined alloy finish.

Please note: Where the standard valve fitted to your car was electronic (solenoid operated) the solenoid cannot be disconnected without causing a check engine light. This valve is designed to replace existing vacuum operated valves.

**In The Box:
1 x FMDVSUPR Valve
1 x Forge Sticker**

If you wish to tune this product to fit the needs of your engine, please see the spring tuning kit below.
