Throttle Body Inlet Pipes for Alfa Romeo Giulia

Cena brutto	1 479,39 zł
Cena netto	1 479,39 zł
Dostępność	Na zamówienie
Numer katalogowy	379177002
Kod producenta	FMTBINL1
Kod EAN	*5056721229263*

Opis produktu

After numerous requests Forge Motorsport are proud to offer two high performance replacement throttle body inlet pipes for the Alfa Romeo Giulia, this is an area on the vehicle which seems to fail after tuning. We have heard of cases from some of our dealers that the OEM plastic pipe starts to split under increased boost pressure.

With our experience and expertise in this area Forge Motorsport has produced a far superior solution for these failing parts. Designed and developed by our highly skilled team on the Solidworks CAD system, the turbo adaptor machined from a single billet perfectly fits the Alfa Romeo's throttle body. Finished with our gloss black anodized finish to prevent oxidization and give it a quality OEM look, we have also incorporated 2 x 1/8th" NPT water meth bosses into the design for tuners to keep the inlet air temperatures on the safe side while pushing the engine to its limits and aiding the option for a maximum power output.

The Forge Motorsport silicone hoses have an increase in diameter which allows for a greater air flow which in turn maximizes the volume of air being forced into the engine. This has the benefit of improving both performance and efficiency especially on vehicles running aftermarket software. However, it's the structural benefit which is the main reason this product is essential, the multi-ply silicone doesn't only take more boost load but will last the life of the vehicle which is why we give this product a lifetime guarantee.

Key Facts:

- Manufactured from 6082 aerospace grade aluminium
- Black anodised for ultimate protection and durability
- No engine check lights (EML)
- Increased air flow over stock item
- The Forge silicone hoses in this kit have been designed to include a specialist inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- Lifetime warranty*
