Turbo Outlet for VW Polo AW GTI EA888 Gen.4

Cena brutto	529,98 zł
Cena netto	430,88 zł
Numer katalogowy	WT-001002515

Opis produktu

Fits for following cars with EA888 Gen.4 engine: VW Polo AW GTI 2.0 GTI (EA888 Gen.4 DNNA) 152kW / 207PS from 08/2021. This is a direct plug and play exchange for stock mounted part. The manufacturer has designed the stock turbo outlet for reducing the noises of the turbocharger while using a silencer. However, this is not an optimal solution for the air flow at the turbocharger outlet (fresh air pressure side). The WagnerTuning turbo outlet was designed with the help of CFD flow simulations for the best possible air flow. The inner diameter has been increased from Ø44mm to Ø48mm. It's a cross-sectional enlargement of almost 20%. This results in a higher maximum performance output and an improved response behavior. Production: CNC-manufactured (Made in Germany) Material: high strength aluminum alloy Color: black anodized Kit comes with: 1 x Turbo Outlet Weight: 1.50 kg Volume: 0.46 cm³/kg
