Turbo Recirculation Valve - 25mm Bosch Diverter Valve Replacement

Cena brutto	1 044,52 zł
Cena netto	1 044,52 zł
Dostępność	Na zamówienie
Numer katalogowy	379174496

Opis produktu

This valve is a replacement for the OEM valves under the part numbers; **06A145710N, 06A145710P, 0-280-142-114, 4441895 (Saab) .**

- **Quicker throttle response**
- **Reduced turbo lag**
- World leading springs for more precise operation and consistency
- All internal and external components have been **made in the UK**
- Replaces the weaker plastic valve
- Pistons use heat stabilised Viton O-rings
- Lubricated with high temperature [Mobil1](#) grease
- **Fully serviceable** and rebuildable in minutes
- Unlike other valves on the market, ours produce no check engine lights (EML)
- **Covered by the unique Forge Lifetime Warranty***

The standard factory fitted Bosch valve was and still is prone to failure of the rubber diaphragm inside, **leading to a boost leak.**

20 years ago, Forge Motorsport recognised this common failing and developed an aluminum two piece replacement recirculation valve, utilising an aluminum piston as a replacement for Bosch plastic valve, (originally the [FMCL007P](#)). This valve soon became the most copied and imitated in the valve marketplace.

The FMDV008 turbo recirculation valve is the result of **25 years of continued experience and engineering expertise.** With the reputation for innovating and manufacturing the best automotive valves in the world, you can be certain that there is currently no better replacement valve available. Forge's recirculation valve features a **greater flow rate than the OEM Bosch valve**, as well as a faster response time, due to its revised design.

10/10, replacement for my stock 1.8t mk4 Golf DV, build quality is over the top

Great bit of kit, well made, easy to service

I bought the FMDV008 and the quality is outstanding from the packaging to the product itself, really is a piece of quality kit, easily fitted with the simple instructions included.... and it really does improve the performance

By using the associated service kit ([FMDVSK](#)), as seen below, the life of the valve can be extended, and the performance can be maintained. With a lifetime guarantee, you can be sure the valve is reliable for your car.

It is fully customisable to fit your application with two uprated springs provided in the kit. Forge Motorsport's improvement on the original valve has a **compact design**, meaning easy fitment under the engine cover. The valve is assembled with a 25mm side pipe, and the vacuum port on the top of the valve is
