Turbo Recirculation Valve with Adjustable Vacuum Port

Cena brutto	1 044,52 zł
Cena netto	1 044,52 zł
Dostępność	Na zamówienie
Numer katalogowy	379174948

Opis produktu

We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner

This turbo recirculation valve is the result of 25 years of experience and engineering expertise. With the reputation for innovating and manufacturing the best automotive valves in the world, you can be certain that there is currently no better replacement valve available. The FMDV008PA version seen here has the benefit of a 90 degree vacuum port, that can be rotated to three different orientations. This is often the preference where either space is restricted, or the original fitment valve has a 90 degree connection, either on the valve or connecting hose.

Forge's recirculation valve features a greater flow rate than the OEM Bosch Valve, as well as a faster response time, due to our revised design. By using the associated service kit ([FMDVSK](#)), as seen below, the life of the valve can be extended, and the performance can be maintained. With a lifetime guarantee, you can be sure the valve is reliable for your car.

It is fully customisable to fit your application with two [uprated springs](#) provided in the kit. Forge Motorsport's improvement on the original valve has a compact design, meaning easy fitment under the engine cover.

In The Box:
1 x FMDV008PA Valve
1 x Uprated Yellow Spring
1 x Uprated Blue Spring
1 x Cable Tie

1 x 2.5mm Allen key
2 x 35mm Hose Clamps
1 x Instruction Booklet
1 x Forge Sticker
