Uchwyt do Dodatkowych 4 Świateł Purelux WRC Czarny

Cena brutto	180,00 zł
Cena netto	146,34 zł
Numer katalogowy	HS17046

Opis produktu

Purelux WRC is a series of auxiliary light mounting brackets designed for installation behind the license plate. This specific bracket allows the installation of up to four round auxiliary lights on the front bumper of a vehicle, positioned discreetly behind the license plate. The bracket features four individual mounting points for round auxiliary lights with a maximum diameter of 230 mm, making it suitable even for larger 9-inch round lights. Mounted behind the license plate, the installation remains clean, subtle and visually unobtrusive. Compared to standard license plate brackets, the WRC bracket is manufactured from 3 mm thick material, providing a rigid and durable structure that will not bend or vibrate under the weight of large auxiliary lights, provided the bumper mounting is correctly adjusted. The bracket includes 12.5 × 30 mm mounting slots for the lights, allowing flexible positioning and depth adjustment. Multiple mounting holes make it easy to secure the bracket firmly to the bumper. Purelux WRC brackets are compatible with EU license plates. The distance between the mounting holes is 245 mm in the upper row and 641 mm in the lower row. The total width of the bracket is 673 mm. Note: This offer applies to the mounting bracket only. Auxiliary lights shown or mentioned are not included.
