Opis produktu

For Mitsubishi Lancer owners wanting to release some additional performance and increase sound output, the XFORCE axle-back system offers a cost-effective upgrade that's hard to beat. The 2.5" bore 304 grade stainless steel system utilises a high-flow rear muffler setup to ensure unimpeded exhaust gas-flow and to deliver an audible boost to the exhaust sound output and tone. This rear axle back exhaust system will ONLY suit Mitsubishi Lancer CY5A and CX5A models with 2.4L 4B12 engine. The Dual Outlet will suit factory rear and aftermarket bumper bar. Will not fit on Ralliart or EVO models. Xforce offers a range of uniquely engineered and designed stainless steel bolt on exhaust systems. These exhaust systems bolt directly to existing mounting points making installation easy. They are built to perform well, with materials designed for longevity and like all Xforce exhaust systems they look great! The unique header design increases power throughout the rev range, while providing a great engine audio note - make it roar!
