Opis produktu

Beautifully crafted from 304 Stainless Steel, the 3" bore XFORCE cat-back exhaust for the VW Golf R MK7 is loaded with detail, performance and impressive functionality. At the heart of this system is the carefully designed rear muffler, housing our VAREX valve control which provide owners with a fully customisable sound output, activated using one of the two supplied key fobs. It doesn't stop there though, as this version also includes our Smartbox which allows you to easily expand your exhaust functionality even further; features such as individual valve opening increments, geo-tagged valve activation and a 'mapped' valve position based on inputs such as throttle percentage, revs and vehicle speed, are all available via our free Smartbox app! A 'hotdog' resonator is built in to the centre section to help provide the optimum tone without excessive NVH (Noise, Vibration, Harshness) and the system features brushed pipework that's TIG-welded throughout for great aesthetics and longevity. The quad 4" exhaust trims add the finishing touch to this feature-rich system and with a choice of four different finishes, there's something for every owners' individual taste, too. 3" Pipe work
Brushed finish stainless steel pipe work
Hot Dog resonator
Polished Varex Race rear muffler
Quad 4" polished stainless tip outlet
Varex Smartbox included in kit
