Opis produktu

Power range: 400+ HP Created using our BMW diesel upgrade turbocharger base. It has the most common V-band exhaust and manifold connections, billet compressor wheel, durable ceramic ball bearing core and vacuum control actuator for universal adaptation and efficient power gain. HTD3254B2 Specifications HTD3256B2 Specifications Compressor side: Compressor wheel: 7+7 blades custom reinforced billet; Inducer: 54mm; Exducer: 77mm; Air intake inlet: 76mm / 3"; Air outlet: 90° 51mm / 2"; Core: custom dual ceramic ball bearing; newest generation variable geometry; Turbine side: Turbine housing based on BMW F10 3.0d turbocharger model; Turbine wheel: 9 blades; Inducer: 58mm; Exducer: 56mm; Flange: BMW manifold V-band; Exhaust connection: V-band; Compressor side: Compressor wheel: 7+7 blades custom reinforced billet; Inducer: 56mm; Exducer: 79mm; Air intake inlet: 76mm / 2"; Air outlet: 90° 51mm / 2"; Core: custom dual ceramic ball bearing; newest generation variable geometry; Turbine side: Turbine housing based on BMW F10 3.0d turbocharger model; Turbine wheel: 9 blades; Inducer: 58mm; Exducer: 56mm; Flange: BMW manifold V-band; Exhaust connection: V-band;
