Opis produktu

These filters have a rubber polymer neck and a cone shaped filter element. This enables easy fitting to space-restricted engine compartments, whilst providing a large surface area to maximise potential air flow. The filters are constructed using a stainless steel cage internal and our famous 15mm thick twin layer foam. Ramair universal filters are designed and manufactured for a very diverse range of applications and are hand made in the UK. They are available in many different sizes and styles. Specification Type : Universal Filters Neck Style : Offset Neck - Internal Diameter : 70mm Top Width : 102mm Base Width : 145mm Overall Length : 185Mm
