### Opis produktu

These are the individual springs sold in our FMTVTUN kit. Please select the colour you require using the options above.

Valve Spring Colour Coding: The weakest spring is **GREEN**, followed by **YELLOW**, **BLUE**, **RED**, and **WHITE** which is the strongest. Depending on the supplied original fitment, this represents an increase of **25%**, **50%**, **75%**, **100%**, and 125% respectively.

The standard spring option is for customers who wish to replace a broken idle spring in their twin piston atmospheric dump valve.
